

Welcome to Pearson eText!

How to access your Pearson eText(s)

1. Login through your Pearson Portal or Learning Management System platform using your Pearson username and password.
2. Upon logging in, your personal Pearson eText bookshelf will appear.
3. Click into the desired eText to begin accessing the content and associated multimedia.

How to set up a Pearson eText course for student subscription

Setting up a course is not required, however setting up a course allows you to share eText notes, highlights, and additional material with your students. If you do not wish to set up a course, you may disregard this step.

1. Once inside your eText, click **Settings*** on the upper right corner.
2. On the settings page, click the **Create New Course** button.
3. On the course information page, follow all instructions for course creation.
4. Make sure to record your course number to distribute to students. If you set up a course password, make sure to distribute this to students as well!
5. Your students can then subscribe to your course by accessing their settings menu.

* You can access these settings at any time to:

- **Set up new courses.** You may set up as many courses as you like and customize each.
- **Customize your eBook** by reordering, showing and hiding chapters, and by adding notes and highlights.
- **Access a student roster** with information about students "subscribed" to a particular course ID for an eText.
- Alter other **personal settings**.
